

Populations

I will be able to describe characteristics of a population and identify patterns of population growth.

Date:

What are the characteristics of a population and patterns of population growth?

Biology

What are the three characteristics of a population?

Notes

What factors affect growth rate?

What is exponential growth?

What does a graph of exponential growth look like?

What is logistic growth?

What does a graph of logistic growth look like?

What are some things that might cause a population to have a negative growth rate (shrink)?

Summary
