

The Role of Climate

Objective: I will explain the role of climate in patterns of life on Earth.

Date

Essential Question: What is the role of climate in patterns of life on Earth?

Class

What is climate?

Notes

How does the Earth retain heat?

Why are there differences in the amount of heat a place on Earth receives?

How does the Earth transfer heat from places that get more heat to places that get less?

What relationship does heat have with the living things that can and do live in a place?

What would happen if heat didn't move around the Earth?

Summary
