

Masses of Atoms

Objective: I will be able to define atomic mass and describe why atoms have different masses.	Date
Essential Question: What is atomic mass and why do atoms have different atomic masses?	Physical Science
<p>What is used in calculating atomic mass?</p> <p>What does it mean when two atoms have different numbers of protons?</p> <p>When atoms have the same number of protons, but different numbers of neutrons, what does it mean?</p> <p>What property can be present in atoms with “extra” neutrons?</p>	Notes
Summary
